

Leak Resistant End Opening Carrier

6"

Aerocom's Leak Resistant easy to open flip top carrier could not be more practical. This flip style lid combines comfort and security all in one. Simply apply light pressure to the closure catch and lift.

If security is what you need In order to prevent unwanted access to materials in transit such as money, laboratory samples or medical records, insert one of the yellow safety seals. This prevents the lid's locking mechanism from opening until the safety seal has been removed. (Special model production upon request)

The closure catch shown below has been designed to flip outward in order to open. This design ensures that any contents placed in the carrier will not hinder or block proper closure as well.

The yellow tab shown at bottom is a safety seal that can be inserted in order to alert the recipient of any unauthorized access. The safety seal must be removed for carrier opening.

Features

- Easy Open Closure Flap
- Complete Payload Access
- Wide Glide Rings provide for Smooth Transport
- Transparent Body for Item Inspection
- Safety Seal Slot for Security Sends
- Made of Durable Lexan®
