

Aerocom's Titan Station - AC3000 Datasheet

The Titan Station offers innovative Technology for today's healthcare needs. With Pass-Thru capability, the need for coveted interstitial space is minimized and transaction footages are decreased.

Functions

The Titan Station introduces the new Pass-Thru technology hospitals have been waiting for. This new design allows carriers to “pass-thru” the station as it is in route to its destination. Carriers no longer have to travel through unnecessary tube routing. Since the Titan is a send/receive station with pass-thru capability the amount of tubing required in systems is reduced and transaction times are decreased.

The Titan sends and receives from above and below. It is available in 6 inch steel.

Operating this station is as easy as any other. To send a carrier, place the carrier into the front loading bay and enter the destination station number. The carrier will be sent in its most direct route.

When receiving carriers, carriers will arrive on a cushioned landing behind a secure door.

Stations are designed to be wall or floor mounted, recessed or cased in.

Special Features

Meets ADA Height Standards

RFID Tagging & Tracking

RTLS Compatible (Real Time Locating System)

16 User Signal Alert Programming

Priority Send/Receive Programming

Secure Dispatch

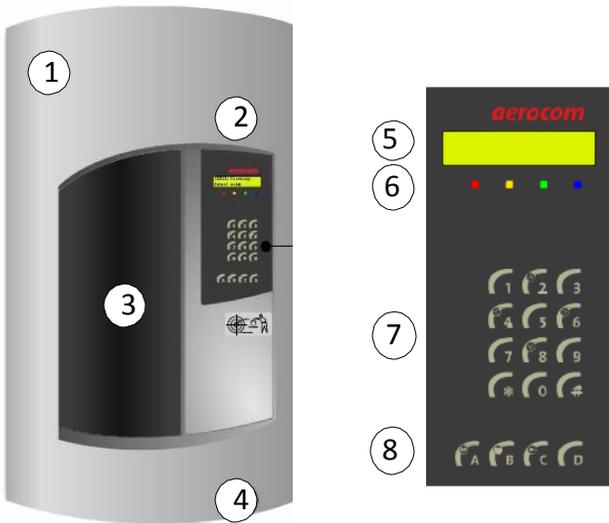

Slow Send for Delicate Samples

LED Keypad

aerocom

Titan Station - AC3000

AC3000 Operating Panel

12345:Pharmacy
Normal Mode

NO. DESCRIPTION

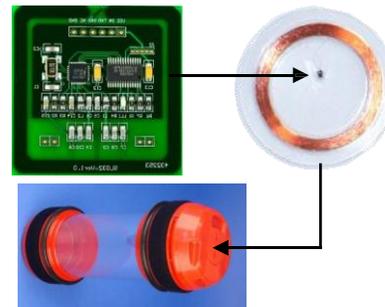

- 1 Titan Station
- 2 Operation Panel
- 3 Send Unit
- 4 Carrier Eject (Receive)
- 5 Display shows
 - Destination Number
 - Name of Recipient
 - Status Information
- 6 Arrival Signals (AS)
- 7 Keyboard
- 8 Function Keys

Receiving Baskets (Optional)

Receiving baskets are available in steel (most common for recessed applications) or wire for wall mounted applications.

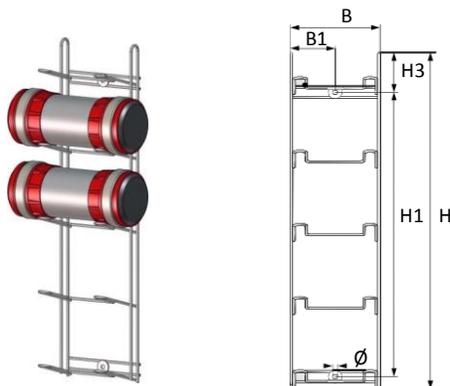

RFID for Carrier Tagging

Tags supported:
Mifare 1k,
Mifare 4k,
UltraLight,
DesFire and
NFC NTAG203

RFID tagging is most commonly used to ensure carriers return to their home station. However, it also offers the ability to track all transactions.

Chrome Carrier Racks (Optional)

	Ø	B	B1	H	H1	H3
Inches	.28	7.87	3.74	29.13	24.80	4.33

Industrial Grade Servo Motor

Titan Stations use Incremental encoders with servo motors for accuracy and reliability.

- High quality DC motor
- Incremental Encoder
- Less Maintenance and extreme reliability

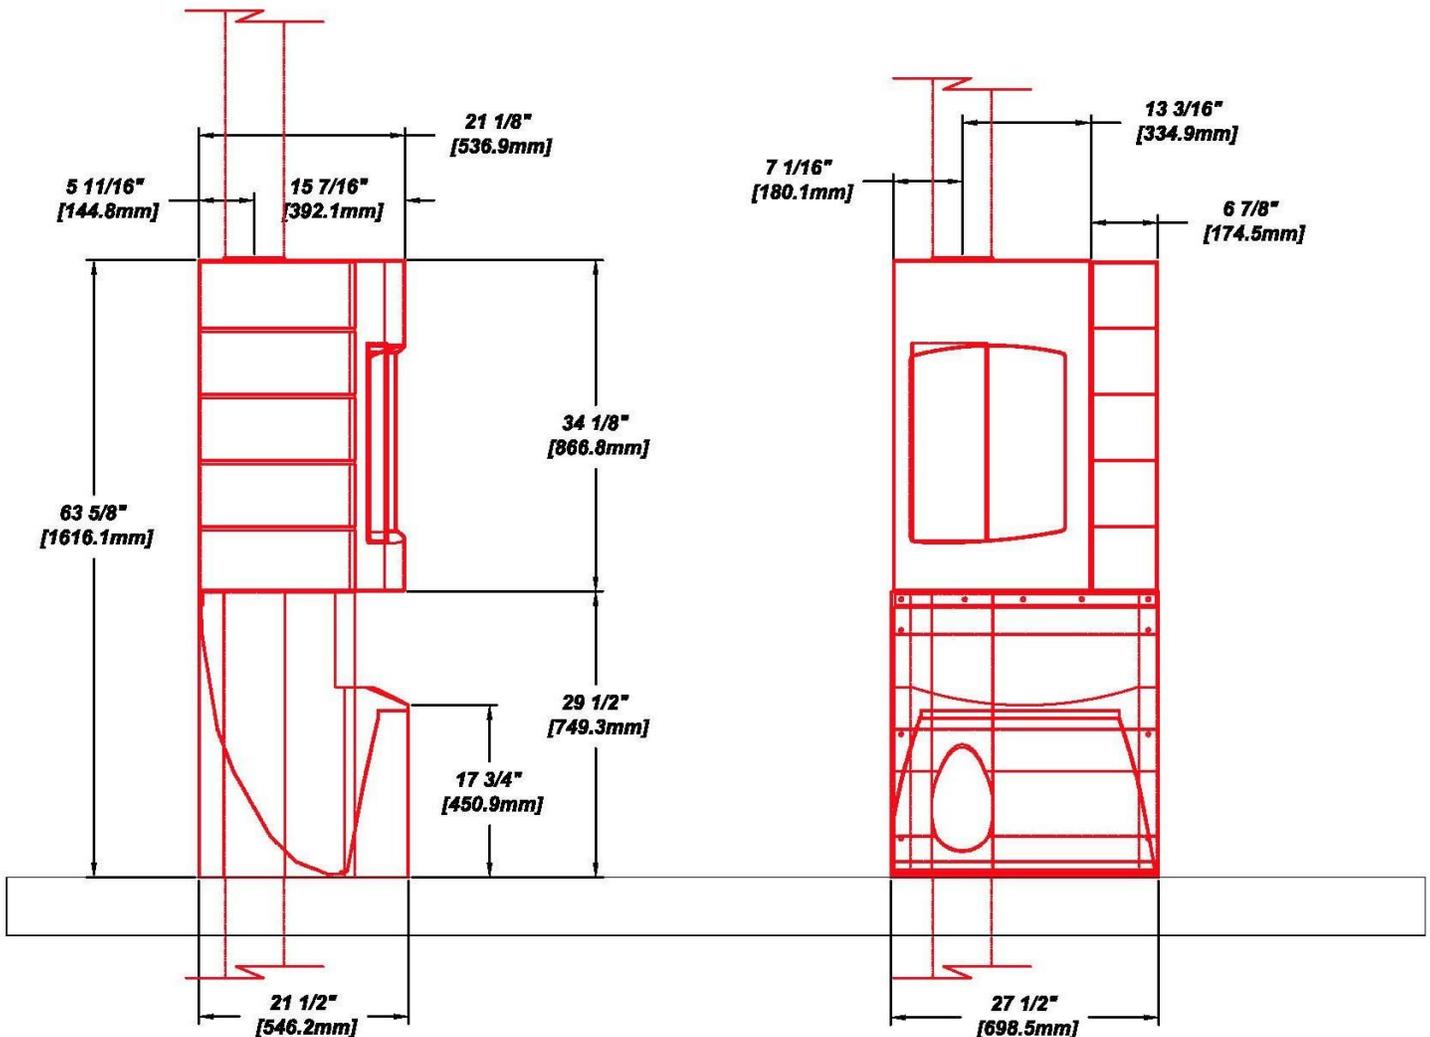

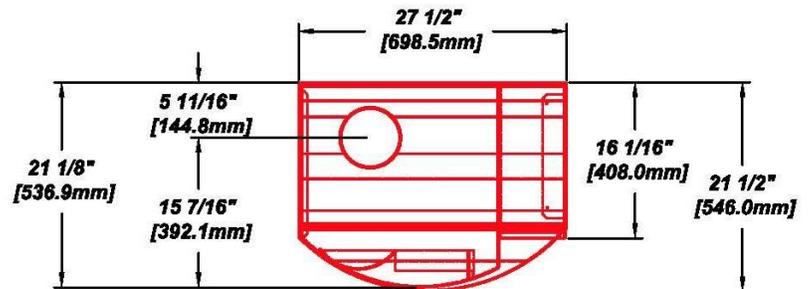

Titan Station - AC3000

Technical Data

Station Weight	77lbs
Carrier Rack	32lbs
Station Basket	34lbs
Noise level	35dbA

- Steel-plate housing, made of Polystyron (non-flammable V0) RAL 7035
- Industrial grade servo motor with integrated incremental encoder
- Software-controlled motor driver
- Movement by roller bearings
- Maintenance-free Teflon - seals
- Noiseless carrier transit
- Fully-electronic, maintenance-free microprocessor controls
